

## ***CUSOURCE* Knowledge Network helps Coast Capital Savings move to a new learning system**

October 24, 2007

TORONTO -- B.C.-based Coast Capital Savings and *CUSOURCE*<sup>®</sup> Credit Union Knowledge Network (*CUSOURCE* Knowledge Network) have been working together to implement a new online learning management system (LMS) for the credit union's 1,900 employees.

Rapidly growing Coast Capital, the second largest credit union in Canada with about 360,000 members, had been exploring the best learning management system for its employees. After several months of due diligence it decided to introduce a LMS from SumTotal Systems Inc. that provides the flexibility and robust services that Coast Capital needs.

In discussions with *CUSOURCE* Knowledge Network, Coast Capital discovered that *CUSOURCE* Knowledge Network operated the SumTotal system and was planning to upgrade its current version in 2008. The two organizations decided to partner on the Coast Capital implementation project.

"Coast Capital carefully researched the best learning management systems available and we are glad that they agreed with us about the high quality of the latest version of SumTotal's system," said Cheryl Byrne, Executive Director, *CUSOURCE* Knowledge Network.

The implementation of the system went smoothly and Coast Capital's employees are now able to access its own courses as well as those available from *CUSOURCE* Knowledge Network.

"We are very pleased with the experience we have had working with *CUSOURCE* Knowledge Network's IT staff," said Tony Williams, vice president of corporate learning at Coast Capital. "I think this is a great example of the system working together. This is an important initiative for Coast University (Coast Capital's corporate university), and we needed to be confident that *CUSOURCE* would be a dependable partner. They haven't let us down. We benefit from their experience with learning management systems, and their course selections."

Watch for news about the upgrading of the current *CUSOURCE* Knowledge Network LMS to the new version during 2008.
